

Aerosols

Sort aerosol bottles that have some of the contents left into hazardous waste. If the bottle is empty and does not have any pressure left, you can sort it into metal collection.

Jätelajit	Metal

Lajitteluohje

Waste for which metal makes up more than half of the weight can be sorted as metal waste. Electric devices and hazardous waste make an exception to this rule - always bring them to an appropriate reception point.

Put small metal waste into the collection container in your yard or take it to a RINKI eco take-back point. Bring large metal scrap to one of our sorting stations free of charge.

Mitä jätteelle tapahtuu?

New metal products are manufactured from collected metal.

Synonyymit

aerosol bottle, aerosol bottles
