Confidential waste

Lajitteluohje

Confidential waste is only taken at the Topinoja (by the scale building) and Korvenmäki waste treatment centres.

- Remove the papers from binders and plastic folders. Staples and paper clips do not need to be removed. Sort the binders and plastic folders as burnable waste.
- Please note, that confidential documents and data security waste are taken into separate containers and that the confidential waste has to be placed in the collection bin by the person bringing the waste.

Mitä jätteelle tapahtuu?

Confidential waste is destroyed. After being destroyed, the now illegible chad is utilised as raw material for the paper industry. Other confidential waste material is delivered to by utilised either as material or as energy.

Synonyymit
