Biowaste

Lajitteluohje

Pack biowaste in wrapping that will decompose, such as newspaper or a biodegradable bag, before putting it into a biowaste container. It's important to pack biowaste in order to keep the waste container clean and odourless. You don't need to pack biowaste for your home composter.

If you do not have access to a composter or biowaste container, biowaste is mixed waste.

Mitä jätteelle tapahtuu?

Biowaste is used to manufacture biogas and fertiliser.
