<b>Jätelajit</b>	Metal

## Lajitteluohje

Waste for which metal makes up more than half of the weight can be sorted as metal waste. Electric devices and hazardous waste make an exception to this rule – always bring them to an appropriate reception point.

Put small metal waste into the collection container in your yard or take it to a RINKI eco take-back point. Bring large metal scrap to one of our sorting stations free of charge.

## Mitä jätteelle tapahtuu?

New metal products are manufactured from collected metal.
