Plastic packaging

Lajitteluohje

Remove lids and caps and put them into the recycling bin separately. Do not stack different kind of plastic containers, because it makes it difficult for the manufacturing plant to sort the plastics.

Sort all other plastic and broken plastic items, such as buckets, toys and dishes, and dirty plastic packaging into burnable waste.

Put plastic packaging into the collection container in your yard or take it to a RINKI eco take-back point. Plastic packaging is also accepted at sorting stations.

Mitä jätteelle tapahtuu?

Plastic waste is processed in a plastic recycling plant and manufactured into recycled plastic products and energy.
