Pressure treated wood

Lajitteluohje

All sorting stations accept up to 1 m³ of pressure treated wood free of charge, larger consignments can be brought to the Topinoja and Korvenmäki waste treatment centres for a fee.

Small metal parts like nails and hinges do not need to be removed.

Mitä jätteelle tapahtuu?

Pressure treated wood is delivered to a recycling terminal. Wood waste is chipped, treated into non-hazardous form and utilised in energy production.

Synonyymit

Saltimpregnated wood, creosoted wood
